

Enterprise Mobile Management

The mobility management landscape is evolving rapidly due to increased remote work, diverse devices, and expanding mobile applications. eutronix EMM, powered by SOTI MobiControl, offers a comprehensive solution for enterprise mobility management.

Our service simplifies device deployment, provides full fleet visibility, and enables centralized management. With detailed reporting and real-time status updates, eutronix EMM allows you to efficiently monitor and secure your mobile devices, ensuring your organization stays agile in today's mobile-centric business world.

Functionalities of eutronix EMM

Express Enrollment

Automatically deliver over-the-air device settings for email, WiFi, VPN, content and enterprise applications based on user, role, location, device properties and custom attributes/data.

Rapid Staging and Provisioning

eutronix EMM rapid provisioning gets mobile devices into the hands of your employees sooner, with less IT time and effort.

Advanced Security Management

Configurable lockdown policies with Kiosk Mode allow administrators to block use of the operating system by replacing the device home screen with a customizable screen that limits users to select applications only. And if a device is lost or stolen, IT Admins, or even the user can locate, lock, or wipe the device.

Remote Control

eutronix EMM provides live, real-time remote support with the fastest, most reliable remote view, remote control and file explorer for Android and Windows devices. Remotr view and advanced devicemanagement is available for iOS devices.

Mobile Content Management

eutronix EMM provides secure content anywhere and anytime. This includes simplified configuration, flexible policy management and robust security.

Management of Smart Peripherals and IoT Endpoints

eutronix EMM offers the industry's tightest integration with connected printers and other IoT endpoints, minimizing downtime with the ability to provision, manage and support new devices remotely.

Benefits of eutronix EMM

A Helping Hand

We understand setting up a SOTI environment is not a daily task so you might need some help with this. For a reasonable fee we will offer you the best service to set up your Mobile Device Management environment.

2nd Line Support

Support is vitally important in case you need it. When it's important to express yourself well, it is a must talking to someone who speaks your native language. Our EMM experts are ready for you and you can expect someone speaking Dutch, English, French or German.

Hosted In The Netherlands

The server of eutronix EMM will always be located in The Netherlands. The Netherlands are well known for their superb and reliable internet connection and their privacy laws.
